Manage Buildings Better With Innotech's Expandable Omni BEMS Controller

Expandable

Omni can support up to 90 programmable points from a single expandable controller

Compact

Save switchboard space with the small footprint providing a large number of points and features

Competitive

Multiple models and flexible points saves money on hardware and installation

Compatible

Omni integrates with any existing Innotech or BACnet control system

Accessible

Omni's cross-platform, on-board web server makes service and facility maintenance a breeze

Fail-Safe

Ideal for critical applications, with on-board data logging, time schedules and battery backup

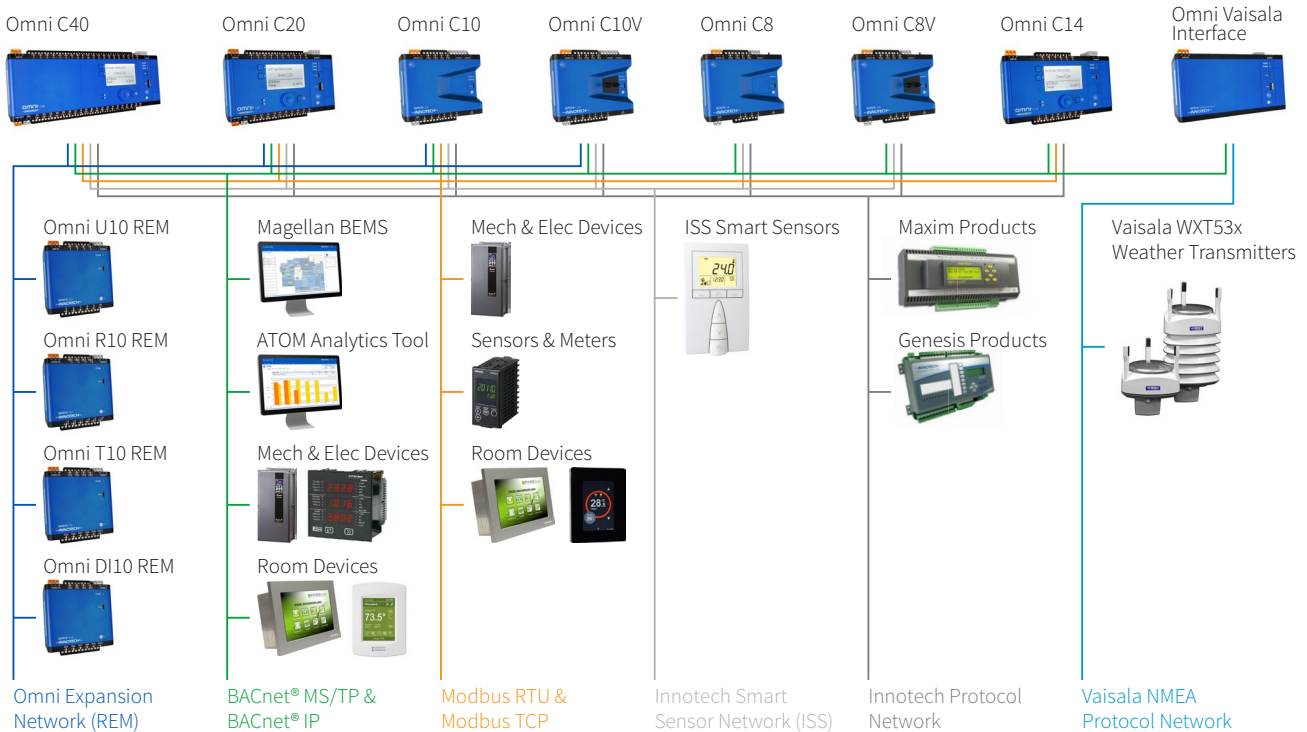

Omni Features

- Innotech protocol plus native BACnet & BTL Listing
- BACnet Routing, BBMD & live BACnet commissioning
- Cross Platform web server with real-time monitoring
- Programmable Points (UI/O) with self-diagnostics
- On-board data logging allowing up to 180 million records
- Real-time clock & battery backup for fail-safe critical applications
- Email & SMS Alarm notification
- On-board or remote HMI
- Compatibility with existing Innotech BEMS networks
- Expansion capabilities for enhanced flexibility & savings

Omni's innovation provides savings from project engineering, installation and commissioning, right through to ongoing facility management.

Omni is the complete BEMS solution for single controller applications to complete native BACnet BEMS networks.
